

On September 13, 2001, Dr. Dyann Wirth, a professor at the Harvard University School of Public Health Department of Immunology and Infectious Disease, testified on this legislation before the House Commerce Committee subcommittee on Health and the Environment on behalf of the Joint Steering Committee for Public Policy. I would like to emphasize the following excerpt from her testimony:

"We support this bill because we believe that in this third millennium it is within the grasp of human capability to accelerate the role of basic biomedical research and the translation of that research to the benefit of the world's least fortunate people. Now is the time; scientific potential is there; it requires only political will to make it reality. . . ."

According to the World Health Organization, infectious diseases account for more than 13 million deaths per year. That means that over the duration of this hearing 1,500 people will die from an infectious disease—half of them children under five. . . .

As you know, most of these deaths occur in developing countries where extreme poverty and lack of access to basic health care, adequate sanitation and essential drugs can seal the fate of children before they are born. However, the enormous volume of travel and trade today have made infectious diseases blind to our national borders. . . .

As we begin the 21st century, we are blessed with unimaginable opportunities to build on breakthrough research to control and prevent global infectious disease. This is not just altruism to reduce the suffering of the world's most needy; this is also a question of national security and health for the United States and its citizens. Renewed investment in the treatment and prevention of global infectious disease is a win-win situation for the country; by helping others across the world we are also launching the best defense to protect the health of our Nation's people."

The knowledge and unbounded imagination of researchers, doctors and scientists such as Dr. Dyann Wirth have ensured the pre-eminence of research that has fostered our freedom and economic well-being. Now, we can empower these individuals in an all-out effort to devise the methods and substances to eradicate disease worldwide. The concern for human life requires us to muster all available resources, bolstered by a concerted, dedicated will to eradicate disease from the face of the Earth.

Please join me in co-sponsoring this important legislation.

HONORING DAN AND MARY KING

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 2001

Mr. McINNIS. Mr. Speaker, today I'd like to congratulate and thank Dan and Mary King of Ouray, Colorado, for having the courage and initiative to take on a project that will enrich the City of Ouray. The couple, who are working to completely renovate the historic Beaumont Hotel, will provide residents and visitors both with a sense of history and foundation.

Dan and Mary, who are from San Antonio, Texas, have made a huge investment in the once crumbling hotel. They purchased what

Lori Cumpston of The Daily Sentinel called "the pink elephant—an eyesore" at an auction in 1998 with the hopes of transforming it into "a revitalized hotel with retail shops, restaurants, and a spa." Currently, the Kings have found fifty workers to help them update the building with new electrical, mechanical, plumbing, and fire suppression systems, as well as handicapped access to all floors. They are also baring the natural brick that has long been covered with bubblegum pink paint. "Every square inch, including the mortar, has had to be hand scraped," Mary said. While the new Beaumont will portray new amenities, however, they are also keeping the hotel authentic. Dan said, "We want to change as little as possible. We want the experience to be that it's 115 years old."

Even though Mary and Dan estimate that the hotel will not be finished until the summer of 2002, the first shop owner in the hotel is already enjoying the King's project. David Smith, whose business is the first in 37 years to open in the Beaumont Hotel, has already opened Buckskin Booksellers at the Beaumont, which houses over 4000 new and rare books. Smith says of the Beaumont, "Most people see this as becoming the core of the town."

Mr. Speaker, the Kings have done a great service in transforming what used to inhibit the town's atmosphere into what might be the new "core" of Ouray. I ask we pay tribute on behalf of Congress to their personal sacrifice and their initiative.

IN MEMORY OF EUDORA WELTY

HON. GENE TAYLOR

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 2001

Mr. TAYLOR of Mississippi. Mr. Speaker, I join my colleagues from Mississippi in expressing deep appreciation and admiration for one of the most gifted literary figures of our state and nation, Eudora Welty, whom we lost this afternoon following a lifetime of contribution to her art. Although recognized and celebrated throughout her career, Welty had a gracious and genteel demeanor. She spoke frequently to students of literature and lovers of writing, encouraging them to develop an ability to listen and to carefully observe before trying to understand or tell a story.

Born in 1909, Welty was a life-long resident of Jackson, Mississippi, where she grew up in a close-knit extended family. She claimed to have been sheltered and protected from outside forces of all sorts. She attended Mississippi State College for Women, the University of Wisconsin in Madison, and Columbia University in New York. She returned to Mississippi during the Great Depression. She held various jobs, including publicist for the Works Progress Administration and a number of lecturing and teaching posts. She also had a love for photography, and took many pictures during that era that were later displayed and published.

Photography had a profound influence on her mode of writing, teaching her that life does not hold still and inspiring her to try to capture its transience in words. Notoriously taciturn about her life, Welty carefully controlled her public persona. She firmly insisted that her work was not political, and did not discuss so-

cial or cultural issues in her work outside those endemic to immediate community and family. She traced her upbringing and mediated upon the forces, both familial and situational, that shaped her as a writer and as a person.

Welty's novels include *The Robber Bridegroom* (1942), *Delta Wedding* (1946), *The Ponder Heart* (1954), *Losing Battles* (1970), and *The Optimist's Daughter* (1972). Her short story collections include *A Curtain of Green* (1941), *The Wide Net and Other Stories* (1943), *The Golden Apples* (1949), and *The Bride of the Innisfallen and Other Stories* (1955). She also wrote the non-fiction works *The Eye of the Story* (1978), and *One Writer's Beginnings* (1984).

Welty's works seem not to reflect so much an attempt to write the great American novel, but rather the act of simply telling a story and having the readers connect with its characters. These beautifully written works offer not only a panorama of Welty's extraordinary vision, but they also give a sense of, as she said herself, "watching a negative develop, slowly coming clear before your eyes."

HONORING TERRY AND VICKI
BRADY

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 23, 2001

Mr. McINNIS. Mr. Speaker, we live in a world where thousands of children are neglected or abused, where television is a common substitute for parenting, and where many parents feel insecure or even indifferent about their ability as parents. Terry and Vicki Brady have not only refused to become part of this dangerous downward spiral, but they have reached out to help direct others, serving as leaders and role models in the most important occupation. For their efforts, they have been selected as Colorado Parents of the Year, and they certainly deserve our thanks and congratulations.

Terry and Vicki, who live outside Idaho Springs, Colorado, are the proud parents of eight children, ranging in age from 5 months to 24 years. They have encountered challenges endured by all parents, as well as a few most hope they never have to face. Their first child, Emily, nearly died in her infancy from a rare disease. Emily survived, but when she began school, severe learning disabilities caused her to be deemed "uneducable." Instead of giving up, Vicki taught Emily at home, eventually helping Emily to learn in ways the family had been told were impossible. As a result of this experience, Vicki and Terry decided to home school all of their children, and to help guide others in the same endeavor.

The two currently run Home Education Network (HEN) Radio, which has led to national recognition in the field of home schooling. Vicki, Terry, and three of their children share the responsibilities of the radio station where they broadcast nationally the programs *Just a Mom and Homeschooling USA*. Vicki, a radio host, facilitates discussions between parents with a wide range of backgrounds, as well as answering questions from callers. In all, they produce live broadcasts four times per week, using it as a means to serve and minister to
